

BETTER SCIENCE. BRILLIANT WATER.®

HIGH PERFORMANCE WATER TREATMENT

Our advanced EVR water softener goes above and beyond to refine the water for your home. Its high capacity resin media and patented self-chlorinating feature combine to deliver a high level of water quality.

The patented technology monitors your systems and allows a precise level of chlorine to pass through the media bed with each regeneration to keep your unit clean. The EVR features our exclusive **Water Efficient Technology**® which fine-tunes the water and salt used to regenerate the media reducing waste. It's also capable of connecting wirelessly with **Wripli**® for complete control of your water while you're on the go.

The system is designed to be environmentally-friendly while safeguarding your household plumbing, appliances, skin, hair, and laundry. The result is more brilliant water through better science, which saves you time and money.

INNOVATIVE FEATURES

Water Efficient Technology (W.E.T.) is a breakthrough in water treatment. W.E.T. is a series of patented features to reduce the amount of water and salt used. Systems equipped with W.E.T. can save up to 50% on salt and water used by the softener.

Wripli is the most advanced WiFi technology in water treatment today. Receive alerts, track water usage and view savings right from your phone, tablet or desktop. You can also activate "Vacation Mode" from anywhere in the world.
